CUSTOM SOFTWARE
DEVELOPMENT

INTERNATIONAL
SOFTWARE
PARTNERSHIPS

TECHNOLOGY
INFRASTRUCTURE

Vision

To be West Africa's most trusted technology solutions company, delivering world-class software development, strategic international technology partnerships, and robust infrastructure that empowers African organisations to compete and thrive in the global digital economy.

Mission

To make enterprise-grade technology accessible and impactful for African organisations by delivering expert custom software, best-in-class international software solutions, and reliable technology infrastructure, with measurable value, lasting partnerships, and a commitment to advancing Africa's digital transformation.

OUR CORE VALUES

Excellence

We set the bar at world-class standards, regardless of our size.

Family

We prioritise mutual respect, open communication, and a sense of belonging within our teams and with our clients.

Integrity

Transparent pricing, honest scoping, and ethical conduct in all dealings.

Innovation

We pursue better solutions, not just familiar ones.

Partnership

We succeed when our clients and technology partners succeed.

Inclusion

Diverse voices and perspectives make our solutions better.

Agility

We adapt quickly, because speed and flexibility matter in a changing market.

Impact

Technology must create real, measurable change for our clients.

SERVICES AT A GLANCE

Every engagement starts with a structured discovery phase. We scope clearly, price transparently, and deliver against agreed milestones.

► Software Development

SERVICE	WHAT WE DELIVER
Web Applications	Business portals, customer platforms, internal systems, e-commerce solutions, approval workflows, and operational tools built around the way organisations actually work.
Mobile Applications	Mobile solutions for field operations, service delivery, customer engagement, data capture, reporting, and distributed teams that need access on the move.
Custom Software Development	Tailor-made systems such as project management systems, HRMS platforms, ERP modules, CRM tools, portals, workflow automation tools, dashboards, and other business-critical applications.
Enterprise Systems	Institution-grade platforms for healthcare, education, real estate, professional services, finance, and public sector use cases, with strong attention to usability, control, and scalability.
API & Integration Solutions	System integrations, middleware, payment connections, mobile money workflows, third-party API connections, and data movement between critical business applications.
Data, Reporting & Workflow Platforms	Operational dashboards, approval flows, reporting tools, document-led workflows, and management information systems that support visibility and decision-making.

Solutions

02

Collaborative,
Client-Centred
Approach

03

Proven Digital
Transformation
Expertise

04

Commitment to
Quality Reliability

05

Long-Term
Support & Growth

➤ Proven Digital Transformation Expertise

We help organisations move from legacy processes and disconnected systems to more structured, scalable, and future-ready ways of working.

➤ Innovative and Forward-Thinking Solutions

We stay close to emerging technologies and proven delivery practices so we can recommend solutions that solve today's problems without creating tomorrow's limitations.

➤ Collaborative, Client-Centred Approach

We work closely with client teams to understand real business needs, define practical scope, and deliver solutions that fit context, budget, and operational reality.

➤ Commitment to Quality & Reliability

We focus on dependable execution, clear communication, and strong delivery discipline so that every solution is built to perform, support users, and stand up over time.

➤ Long-Term Support & Growth

We do not stop at go-live. Our support, training, and advisory services help clients improve adoption, maintain stability, and continue growing with confidence.

INDUSTRY FOCUS

At Innosol Limited, our goal is to deliver practical, technology-driven solutions that address the real needs of different sectors. We combine strategy, implementation, and ongoing support to help organisations improve operations, strengthen resilience, and grow with confidence.

Proven Digital Transformation Expertise

We support private sector organisations with business systems, managed IT support, custom software, and digital tools that improve efficiency, visibility, and customer experience.

Government & Public Sector

We help public institutions deliver secure, citizen-focused services through practical digital platforms, operational systems, and technology solutions that improve service delivery and accountability.

MSMEs and SMEs

We help growing businesses adopt affordable, high-impact systems for accounting, HR, sales, operations, and customer management so they can scale with stronger control and better decision-making.

Finance & Fintech

We deliver solutions that support compliance, integration, customer engagement, operational control, and secure digital service delivery for financial institutions and fintech businesses.

> **Agriculture & Agribusiness**

We build and support solutions that strengthen operations, reporting, supply chain visibility, and decision-making for agribusinesses, cooperatives, and agriculture-focused programmes.

> **Real Estate**

We support real estate firms with property platforms, business process tools, digital customer workflows, and systems that improve coordination, visibility, and service delivery.

> **Professional Services**

We help service-driven firms improve project execution, team coordination, workflow control, reporting, and client delivery through practical business systems and digital tools.

> **Healthcare**

We partner with healthcare providers and health-focused organisations to modernise systems, improve data handling, support service delivery, and strengthen operational reliability.

> **Retail**

We support retailers with digital tools for sales, inventory, customer engagement, reporting, and business operations across both physical and online channels.

LEADERSHIP

Michael Abbiw

Executive Director & Founder

Michael founded Innosol Ghana Ltd with a clear conviction: African organisations deserve world-class technology delivered by people who understand their context. He leads all strategic vendor partnerships, client relationships, and market positioning. His experience spans sales and marketing, technology consulting, IT solutions delivery, and business development across private sector, insurance, healthcare, education, and development organisations.

David Charway

General Manager & Chief Technology Officer

David leads Innosol's technical delivery, product development, and digital execution. With experience across software development, IT operations, digital marketing, and business systems implementation, he helps translate client needs into practical, scalable solutions. His work focuses on building reliable platforms, improving business processes, and ensuring technology investments deliver measurable operational value.

Christiana Agyebeng-Gyamera

Head of Operations

Christiana brings strong experience in project management, policy implementation, and stakeholder coordination. She leads operational execution across the business, helping to turn strategy into action while strengthening delivery, internal systems, and cross-sector partnerships that create long-term value for clients and the organisation.

Obed Ekow Abbiw**Head of Finance**

Obed brings a strong background in financial management and organisational oversight. He is responsible for safeguarding the company's financial integrity, improving operational efficiency, and supporting sound decision-making through disciplined planning, attention to detail, and a strong commitment to professional excellence.

Ophelia Gyapong**Head of HR & Admin**

Ophelia is a dedicated human resources professional with a strong focus on organisational development, talent management, and administrative efficiency. She leads HR and administrative functions at Innosol, helping to build a productive workplace, strengthen employee relations, and ensure people and operations remain aligned with the company's strategic goals.
